CLARESHOLM, ALBERTA, FRIDAY, MAY 21, 1926

Hurry! Hurry! Hurry!

TO

The Men's and Boys' Store

We only have a few suits left of the wonderful bargains which we have had on sale. Come early and get your size. Almost two suits for the price of one.

We are also putting on a shoe sale. Wonderful bargains. Our loss is your gain. Don't fail to get one or two pairs:

14 pairs Men's Dress Shoes, regular \$9.75 for \$6.95
49 pairs Men's Dress Shoes, regular \$7.50 for \$4.95

C. J. BRAREN

CLARESHOLM LOCAL NEWS

Mrs. J. Cluett of Calgary is visiting her sister Mrs. Shurples.

Mrs. Calahan Sr. was taken to the Calgary hospital on Monday.

Mrs. Eddie McLeod is visiting her mother Mrs. Stackpole at Cardston.

Mrs. H. A. Fairbairn left on Wednesday for an extended visit in Ontario.

J. M. Soby is planning to erect a brick building where his furniture store now stands.

Dr. Tupper has this week disposed of his herd of Holsteins to W. U. Hart of Meadow Creek.

The Clareholm U.F.W. No. 294 will hold their regular meeting in the rest room on Friday afternoon, May 28.

Arthur Boniface has leased the Chas. McGowan farm for three years, from the Canada Life Assurance Company.

On account of the postponement of sports day the Golf Club dance has also been postponed and will be held on the night of sports day, in June.

Owing to lack of time to get it set into type, the report of the district meeting of the W.C.T.U. has been unavoidably laid over till next week.

The Ladies' Guild of St. John's church intend holding a flower tea and sale of home cooking in the Parish Hall on Saturday, May 29th, from 3 to 6.

The four tea hostesses at the Parish Hall on Saturday, May 29th, will be Mrs. Anderson, Mrs. Godley, Mrs. Gutter and Miss Reid. We hear of innovations.

At the Rex theater Friday and Saturday this week: "Night Life of New York" with Rod La Rocque, Dorothy Gish and Ernest Torrence. From the story Edgar Selwyn.

Mrs. Guy and Mrs. Hartwell will preside at the home cooking table in the Parish Hall on Saturday, May the 29th. They hope to please even the most fastidious. Ladies of St. John's Guild.

The local football team journeyed to Vulcan on Wednesday where they played a closely contested game with the Vulcan team, the result being a score of 1 to 1 in Vulcan's favor. The local team will play a return match at Clareholm in June.

Preliminary notices state that the provincial election will be held about July 5th. Matters will soon be getting interesting and the first shot locally will be fired by the Conservative party at a public meeting on Wednesday, 26th May in Clareholm, at 8:30 p.m.

Mr. and Mrs. J. W. Halbert and son Willie left on Wednesday by motor car for Great Falls, and from there they will travel eastward by way of Milwaukee and cross the lake, entering Canada again at Sarnia. They will sail from Montreal on June 12 on the Canard line Alania for the old country.

Posters are now announcing a Conservative public meeting on Wednesday evening 26th May, at 8 p.m., to be addressed by C. E. A. Jamieson of Kettlebridge. On his last appearance on a Clareholm platform Mr. Jamieson created a very favorable impression and there should be a large attendance to hear him on Wednesday.

Word has been received from district headquarters that the brigade camp for cavalry units will be held at Soree Camp, Calgary, commencing the second week in July. Definite dates have not yet been set. The local "B" squadron of the 2nd A.M.C. will go to camp with a strength of twenty men. Present plans of headquarters are to have the unit march in to Calgary, taking two days to make the ride, stopping overnight at Sarnan and picking up the Sarnan "C" squadron at that point. There will be vacancies for a few new members in the local unit due to some members not being able to get away for camp, and anyone wishing to attend camp should get in touch with one of the officers of the unit or any member, at once.

DIONNE-BELL

On Wednesday, May 12th, the home of Geo. W. Bell of Meadow Creek, was the scene of a very pretty wedding when his eldest daughter Jessie Ethel Mary was married to Mr. Edouard Dionne, a son in the firm of Dionne & Sons, Heath Creek.

The house was turned into a bower of beauty with Saskatoon blossoms when the bride entered the presence of a few relatives and intimate friends on her father's arm, to the strains of Mendelssohn's Wedding March beautifully rendered by Mrs. J. J. Bell of Clareholm.

Her twin sisters Elizabeth and Jean attended her and the groom was supported by the bride's brother Mr. Wallace Bell.

The ceremony was performed by the Rev. Mr. Langille of the United Church of Granum, and afterwards the company sat down to a bountiful wedding dinner.

The bride wore a gown of "ashes of roses" canton crepe and carried a bouquet of roses and ferns. The bridesmaids wore lovely peach colored embroidered gowns of canton crepe and carried bouquets of carnations and ferns.

After a short interval the bridal party left for the Meadow Creek school where a dance had been arranged and where guests were already gathering. A large representative crowd showered the married couple with all sorts of good wishes.

Miss Bell is well known over a large section of this country for she has since early girlhood assisted her mother the late Mrs. Bell to dispense a large and generous hospitality.

The elder Mr. and Mrs. Dionne formerly resided on Meadow Creek and "Ed's" enjoyment of his sports and unalloyed good humor are well remembered by his former companions.

Hosts of good wishes therefore follow the young couple to their home on Heath Creek where they will reside after their return from their honeymoon.

Dancing was continued until the early hours of the morning. After a hurried breakfast and change into travelling attire, Mr. and Mrs. Dionne motored to Clareholm, where they took the 7:45 a.m. train for Calgary and Banff.

Many beautiful gifts, among them a large number of silver, china and cut glass, attest the affection and interest of their friends.

Conservative Association

A meeting to organize a Ladies' Conservative Association for Clareholm vicinity will be held at the home of Mrs. J. R. Watt on Thursday 27th May, at 3 p.m., to which all ladies interested in returning a Conservative business administration for Alberta are invited.

Chinook Gossip

Mrs. Walter Byer entertained a large number of friends at dinner on Sunday.

Mrs. R. F. Henker spent the week end in Calgary.

Henry Moritz is busy painting up the farm buildings for C. E. Henker.

A few of the neighbors spent Sunday on the Old Man river, and Mrs. W. C. Sherman, Mr. and Mrs. E. H. Arlt, Mr. and Mrs. P. S. Clarke, and the Messrs. Harry Dinn and Geo. Frank motored to the Kevin-Sunburst oil field the first of this week.

Jim Peterson was taken to the hospital in Calgary last Sunday. Mrs. Peterson is in the hospital at Macleod. Mrs. McDonald, formerly Miss Della Clarke, has charge of the place.

Seeding is completed in this district. Some of the fields have drifted badly on the high winds while others are badly infested with wild cats.

THE BLOOM OF HEALTH

Will never appear on the cheeks of those who have impure blood. When nature fails to remove waste matter and impurities we advise

NYAL BLOOD PURIFIER

A scientifically prepared remedy for impure or over-rich blood. It clears the skin of pimples and blotches and restores general good health. Get rid of accumulated poisons by taking Nyal Blood Purifier now.

CLARK BROS.

Remarkable Man Who Was Friend And Confidant Of Princes And Paupers Alike

"Colonel George Henry Ham, familiarly referred to by his people as 'George Ham,' was not only one of the best known and most popular men in Canada. He also enjoyed the distinction of having probably been called by more names than any other citizen of the Dominion. Let us hasten to add the names were friendly and complimentary to the highest degree. They include: 'A large body of superlative humanity entirely surrounded by the Canadian Pacific Railway' (New York Times); 'A great national asset' (Sir Thomas White); 'The greatest untried but unbound in Canada' (Collier's Weekly); 'Ambassador-in-Chief of the C.P.R.'; 'The Mark Twain of Canada'; and 'Canada's Livingstone.' Opinion is unanimous that he deserved them all."

George Henry Ham came most into the public eye through his connection with the Canadian Pacific. But his

life, in 1891 the big opportunity of his life came. Sir William Van Horne met him at Winnipeg and offered him a position with the title of Travelling Passenger Agent, but with duties similar to those he always carried out for the company. He accepted and hereafter went with but one short break, remained on the payroll of the Canadian Pacific Railway, being steadily advanced, having the official title occasionally changed until at last he really was "Ambassador-in-Chief of the C.P.R."

So it came about that for year upon year George Ham travelled to and fro over the first-flying rail and steamship lines of the great company, in Canada and Europe and down through the United States, carrying the doctrine of goodwill towards the Canadian Pacific and wide with his pen and his tongue, and in doing so distinguished visitors a good time. Soon his name was known from the Arctic Circle to the Gulf of Mexico and from China to the Old World and not only so, but George Ham was to be altogether outside the rate.

Apples Cross Pacific As Ordinary Express

B.C. Fruit Grower Satisfied With Success of Trial Shipment

Two boxes of Yellow Newtown Pippins shipped from Kelowna, British Columbia, by John Delfant with out refrigeration, have arrived in New Zealand in perfect condition, according to J. O. Turcotte, Canadian commissioner. These apples were packed and shipped on Oct. 23 and kept in common storage in a cellar until Feb. 5, when they were expressed to Vancouver. On Feb. 10 they were shipped on S.S. Niagara and after two freight hauls and one more water transfer were delivered to Dunedin, N.Z., on March 16.

Writing of the shipment, which was a trial one, Mr. Turcotte says: "The apples were delivered in perfect order; not more than fourteen apples in the two boxes were spoiled, the others being absolutely perfect."

This is Mr. Delfant's second experiment of this kind. While at the exhibition at Wembley he had an order of cherries sent to him from British Columbia, and then later sent part of them back as far as Winnipeg, and no deterioration was noted in either method. He claims that the present trials of fruit export may yet see a radical change. The great difficulty to overcome in shipping late apples is said, and Mr. Delfant claims that this may be obviated by shipping in this manner.

Canada's Newspaper Production

In Two Months Exceeds U. S. Output Over 5,000 Tons

Production of newspaper in Canada for the first two months of the calendar year exceeded that of the United States by over 5,000 tons, according to a report issued by the Canadian Pulp and Paper Association, which states that the output in the Dominion amounted to 275,521 tons, as compared with 268,645 tons in the United States. The output of the Dominion during February last was 135,662 tons, an increase as compared with the 116,621 tons produced in February of last year, but a decrease when compared with the output of 126,658 tons in the previous month. This decline was due to the shorter working month since the daily output in February was appreciably greater than in January.

Investment In Canadian Mines

Of \$52,444,000 Ontario Accounts For Forty-one Per Cent

Statistics compiled by the Bureau of Statistics show the investments in Canadian mining enterprises have increased to \$52,444,000 in the first two months of the year. Ontario accounts for 41 per cent of the total investment in the Dominion. The investment in Ontario was \$21,555,000, an increase as compared with the 19,621 tons produced in February of last year, but a decrease when compared with the output of 126,658 tons in the previous month. This decline was due to the shorter working month since the daily output in February was appreciably greater than in January.

May Open Another Grading Warehouse

Growers Report Rapid Advance In Business Of Seed Pail

Business of the seed pail has grown to rapidly during the two seasons of the year. The growth is being considered the advisability of opening up another assembling, grading, inspection and storage warehouse at some central point in the northern part of the province. M. P. Tullis, secretary of the Saskatchewan Registered Seed Growers Cooperative Association, Ltd., has announced. Satisfaction may be based upon, because this would facilitate both inward and outward shipments, as well as being economical in freight costs. Mr. Tullis said:

"If final arrangements are made, no doubt everything can be in readiness to take in grain for cleaning shortly after threshing this fall," he explained. The new plant's present plan is in the works.

Canada's Standing Timber

One-third of World's Total Is On Vancouver Island

Canada's timber areas form one of the largest and most valuable in the world today, one-third of the total being on Vancouver Island of exceptional quality, chiefly of Douglas fir, hemlock, red cedar, spruce and balsam. The fir is ideal for building purposes and for railway ties for which it is in great demand. It also played a large role for the first time.

New Experimental Stations

Three experimental stations will be established this year by the federal department of agriculture, one in Northern Manitoba and the other in Northern Saskatchewan. The Manitoba station will be located in the Dauphin district and the other in the vicinity of Thredbo, Saskatchewan.

Agricultural Outlook

Present Conditions Are Reported To Be Very Favorable In Western Canada

Farmers in the prairie provinces are pleased with present conditions and speak optimistically on the season's outlook, according to a special agricultural survey issued by the Canadian Pacific Railway. A mild winter after general falls of rain last autumn and reasonable snowfall since have assured practically all sections in western provinces of sufficient moisture to meet spring requirements. Livestock wintered well, with less loss than the average because of good weather and available supply of feed. Acres of land prepared closely approximates last year's total for each province, being as follows: Manitoba, this year, 2,557,700, last year, 2,542,000. Saskatchewan, this year, 7,448,485, last year, 8,555,683. Alberta, this year, 3,616,486, last year, 2,751,689. Grand total, this year, 15,625,671; last year, 15,293,572.

Ship Buffalo North

Further Shipment of Wainwright Buffalo to Be Sent North This Year

Another movement of buffalo from Wainwright to the far north will take place in June this year, according to Col. J. K. Cornwall, who has returned from Ottawa. The shipment will include 1,400 yearlings, 400 old two-year-olds and over 100 three-year-olds. The distribution being on the basis of two females to one male. Rangers have reported that the animals now in the northern park are in good condition and wintered well, says Colonel Cornwall.

Manitoba Fisheries

Successful Winter Season Is Reported By Fishermen on Shores of Lake Manitoba

The fishermen along the west shores of Lake Manitoba have just closed one of the most successful seasons in recent years. Though the catch has not been greater than in the average season, the prices secured have possibly been the highest ever received. A conservative estimate of the total shipments for the season from two stations alone—Langruth and Amnord—places the value at over \$100,000.

Homestead Entries

Patents Granted For 62,782 Acres In Last Fiscal Year

The number of letters patent issued during the last fiscal year for homestead lands in Western Canada totaled 4,304, covering an area of 625,782 acres. In the same year 2,629 homestead entries were granted aggregating an approximate area of 584,450 acres. In addition 251 soldier patents were made during the year, totalling an approximate area of 52,140 acres.

Soviets Close Textile Factories

Due to a shortage of raw materials the Soviet Government plans to close nearly 100 textile factories for periods ranging from six to six weeks. The factories will receive 50 per cent of their normal wages. Several hundred thousand are affected.

The average woman knows how to manage her daughter's husband.

Tiny Traveller Terror of Ticketmen

Joseph Mary Branch, aged 2½, of Notre Dame de Grace, Montreal, who recently arrived in that city from the Canadian Pacific Railway, is probably the most travelled girl in the world. With that trip she covered 42,265 miles by land and sea, and of these 20,000 miles were by rail. In Canada, the United States and Australia, and every mile of her was carried free. She started at five weeks old when she journeyed from Sydney to Melbourne, then on to Adelaide and back to Sydney again, a distance of 2,520 miles. But the ticketman passes her by when it comes to taking up fares, he always stops for a little rest with winsome Miss Branch, for her regular fare pays her way all over the world and everyone is glad to make her acquaintance.

Says Wheat Pool Has Proven A Big Boon To Farmers Of Saskatchewan

Rural Schools Competitions

Horticultural Council Encourages School Ground Development

There can be no good reason why so many of the school grounds in this country should be so bare and unimproved. Many sections have been planted with trees, many varieties of native shrubbery useful for decorative planting. Even with this ready at hand planting material great improvement might be made using the time of the annual Arbor Day for doing the planting. With but a small amount of money spent on well chosen nursery stock, school grounds may be made not only a delightful spot for the children during the summer months, but an object lesson and a provision to improve the home surroundings on every farm. The Canadian Horticultural Council, conscious of the need for a more general betterment of school grounds, has organized competitions between the rural schools in each province and provided a beautiful trophy cup and trophy to be worked for. Provincial committees have this work in charge. No entry fees are asked but competing schools have only to make known their desire to enter and to supply a photograph of the grounds as they appear at the beginning of the season. This photograph is to be compared in the autumn with one taken at that time showing the work that has been accomplished. Entries will be received and further information supplied by L. F. Burrows, secretary of the Canadian Horticultural Council at Ottawa.

To Build 100 Elevators

Indication of Improvement in Farming Conditions in Manitoba

According to press reports, stated to come from an authoritative source, more than one hundred grain elevators will be built in Manitoba this summer. To this total it is expected an additional number will be erected under the necessity of getting to the bank to borrow at a high rate of interest to carry them over to next crop. A high rate of interest has been secured whether the banker nor myself knows whether the Lord is going to give me a crop or not and the element of risk is so high that my interest has been high.

The reported decision to build 100 more grain elevators in Manitoba is another indication of the improvement in farming in that province, favoring the necessity of getting to the bank to borrow at a high rate of interest to carry them over to next crop. A high rate of interest has been secured whether the banker nor myself knows whether the Lord is going to give me a crop or not and the element of risk is so high that my interest has been high.

The pool has within its power to disburse the marketing of wheat over twelve months, 40 paces on a risk involved in doing so to the farmer who produced the wheat, and thus avoid the necessity for speculation and hedging, which has been of necessity part of the grain exchange method; to the farmer who produces for his own use over the whole year, thus partly removing the necessity for short time loans, and putting him in a position where he should be able to secure money in long time loans at a lower rate of interest. The farmers of this year who they grew last year, and they do not have to wait for the wheat pool to give them the money for their grain that has come to agriculture since the opening of the west."

Tough Grain For Seed

After Threshing Cleaning It Is Suitable For Spring Sowing

After a thorough investigation, it is the opinion of the officials of the seed branch in the west that farmers have been making a mistake in not cleaning their grain before sowing. Several hundred thousand are affected. The average woman knows how to manage her daughter's husband.

Germany Setting Precedent

Grain Trading Company Will Study Saskatchewan Farm Prices

Germany is setting a precedent in crop price stabilization. The German Reichstag appropriated \$7,500,000 to be used by a German Grain Trade Company composed of farmers, fertilizer syndicates and others. The purpose of the company is to study wheat and means to render German agriculture profitable, and also to stabilize grain prices by buying, storing and selling grain.

What Provinces Produce

An agricultural returns report reveals that Saskatchewan, in addition to being the leading wheat producing province of Canada, is also the largest producer of oats in the Dominion and similarly leads in the output of flaxseed. Manitoba leads as a producer of alfalfa and the Dominion's greatest producer of alfalfa, while Quebec leads in the yield of hay and timothy.

Sensible men and women are always glad to unjust criticism.

His First Glimpse

Striding along the quays of New York harbor, an Irishman came across the wooden barricade which he placed around the enclosure where emigrants suffering from contagious diseases are isolated. "What's this boarding for?" he inquired of a by-stander.

"Oh," was the reply, "that's to keep out fever and things like that, you know."

"Indeed," said Pat, "O'live often heard of this sort of thing, but it's the first time O'live seen it!"

It is champion Egg Eater To win a \$10 bet, H. Tracy Ansell, of Washington, has sent 48 soft-boiled eggs for breakfast in a restaurant as a challenge.

More than 200 fellow students, who had gathered to witness the feat, cheered as Ansell passed the 15th, 21st, 26th and 34th eggs. Ansell was allotted 45 minutes to complete his demonstration, but finished handsily in 41 minutes flat.

Alberta Boys For Scotland A dispatch from London says a group of 25 experimental shipwrecked of Alberta boys received there have proved highly capable and the boys have been selected for the opening of a new market for western produce as long as the quality and prices are right.

Why do the tallest people in a crowd always manage to get in front?

HERE AND THERE

Whole families of Indians on the Island of Manitowaning in Georgian Bay, work all winter making twelve-inch bark canoes which are sold as ornaments. A shipment of four thousand eight hundred of these passed through Dominion Express yards at Montreal recently for a New York destination. The old-time Indian canoe is represented in every detail and every one of the tiny vessels is beautifully decorated.

A passenger on a Quebec train was suddenly stricken with an epileptic fit and collapsed in the Windsor Station, Montreal, recently severing an artery in the neck. Constable W. W. Peterson, of the C.P.R. investigation department rendered first aid immediately until the ambulances were called. On arrival at the hospital the house surgeon complimented Peterson on his clever work. Constable Peterson is a member of the C.P.R. Police First Aid team.

A special C. P. R. train carrying 438 settlers from the S.S. "Montcalm" reached Winnipeg recently. Among the passengers were thirty-one British families who came under the 3,000 family settlement scheme. There was one party of 10 German-speaking Catholics, and the Salvation Army, under Captain Sharp, brought out a party of twenty young lads going to British Columbia.

It has been announced by the passenger department of the C. P. R. at Winnipeg that negotiations have been complete with the Central Canada Air Lines Limited, for an air service between Kenora and the new gold fields at Long Lake and Red Lake. A regular daily service is to be inaugurated about May 24 in connection with the C.P.R. from Kenora and during summer services will be run between Kenora and Duluth.

The recent fire at the Banff Springs Hotel, which resulted in the destruction of the north wing with about seventy rooms, will have little effect on the coming tourist season. During the past winter the company has built an annex with 100 rooms with baths and, with the central stone tower and the south wing of the old building that were saved, there will be a total of 313 rooms available by July 1, or more than were in use last year.

FIRE THREATENS OUR NATIONAL HERITAGE

Carelessness Destroys 3,000,000 acres annually of Canadian Forest

Loss of standing timber by fire continues to be appalling. On the average, over 3,500 million board feet are destroyed annually. The forests of Canada are being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the seedling trees and young growth as the pulp and paper mills, and industry generally, are dependent on mature timber—both must be saved from the ravages of fire.

In addition to the shelter afforded by the forest to the farmer and his stock, settlers in forested regions are vitally dependent on the woods for winter employment. Care with fire, in land-clearing operations is all-essential.—
burned timber pays no wages.

Canada has the finest inland fishing in the world, but these splendid food and game fish require clean, cold water in the streams to ensure prolific reproduction. Forest fires are inimical to fish life.

Game animals attract foreign tourists and induce Canadians to seek pleasure, health, and adventure in the great outdoors. These animals are distinctly a forest resource—utterly dependent on it for protection and food. Forest fires are most destructive of such wild life.

Ninety per cent of the forest fires are caused by carelessness. Are you doing your part to prevent this wanton waste and destruction?

ADDED safety and easier driving are big reasons for the better popularity of the Better McLaughlin-Buick.

McLaughlin-Buick's better steering gear (the most expensive type built today) has five times the ordinary control surface.

More than 400,000 4-wheel-brake McLaughlin-Buicks have proved the superiority of McLaughlin-Buick mechanical 4-wheel-brake design.

And McLaughlin-Buick Controllable Beam Headlights now make night driving safe. They furnish bright light, all the time, without glare in the eyes of oncoming drivers.

Your family and you will feel safer and be safer in the McLaughlin-Buick.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

WORLD HAPPENINGS BRIEFLY TOLD

Married women, travelling alone to Cuba will have to show authorization from their husbands before they can receive admission.

A reduction in the prices of automobile tires is announced for Great Britain. The reduction amounts to an average of ten per cent and has become effective.

About the only place in the world where the birth rate has been increasing much lately is the South Sea Islands. The League of Nations has determined.

"Joker" is the name London has devised for new two-wheeled taxicabs which are to circulate in London streets in an effort to combat high prices charged by cabs which seat four passengers.

Large shipments of Australian butter which have been arriving in Canada recently via the United States are responsible for the recent reduction in the price of butter in some parts of the Dominion. It is stated.

The new Mexican immigration law has been published in Mexico Official, thereby becoming effective. The law requires tax on all incoming aliens and registration of all aliens. It prohibits the entrance of aliens pursuing a calling forbidden in Mexico which may be applied to ministers of the gospel.

Blue sky legislation applicable to companies incorporated under Dominion charter will not likely be introduced, as it is understood, to be introduced during the present session of parliament. The prevailing opinion appears to favor calling of a conference with representatives of all provincial governments before any steps are taken in this matter.

Minard's Liniment for Burns

Remarkable Increase in Oriental Demand for Canadian wheat is reflected in the regular statistical report of the Vancouver Merchants' Exchange. To the end of February the Orient took 16,001,775 bushels, as against 2,012,419 bushels in 1921-22 and 8,268,260 bushels in 1922-23. This increase is due to growing favor of Canadian hard wheat and to the fact that prices were right this season.

She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McClellan, Charlotte, N.C., writes: "About a year ago I was greatly troubled with my heart. I could not sleep at night, and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the lights before I could get to sleep. After having read of your

I took several boxes of them, and can now get a full night's sleep with out any trouble, and feel fine in every way."

Victoria Falls A Revelation

Wonderful Sight For Tourists Traveling in South Africa

The South Africans are not posting up a good thing when they are concerning the tourist trade to enter Africa through the Cape and travel beyond the Zambesi to Victoria Falls. These have proved a revelation to citizens of the republic who refused to imagine anything surpassing Niagara. One lady, returning from the Bala Forest, as the surrounding hills is called, said to a correspondent of the Cape Times accompanying the governmentally encouraged tour of American visitors: "These falls leave me wondering. Never in all my life have I seen such a glorious sight. The Victoria Falls would be nothing without this driving spray. It is the fact that you can't see the bottom that makes it so mysterious. The bottom may be a mile below for all I know, and that is where you are left wondering. Niagara is not a patch on this—a place where thrill succeeds thrill until you become spellbound." Another member of this ship's party of American tourists, said to be prominently connected with United States steel, told the South Africans that Americans are looking for new places of travel, hunting for new places. The tourist traffic they bring in their wake is thought by the South Africans to be well worth capturing. Western Canada has some thrills of its own that its governments might endeavor to well worth capturing. Western Canada has some thrills of its own that its governments might endeavor to well worth capturing.

Many Americans are said to be hunting for new places of travel, hunting for new places. The tourist traffic they bring in their wake is thought by the South Africans to be well worth capturing. Western Canada has some thrills of its own that its governments might endeavor to well worth capturing.

ON THE AIR

What is Doing in the World of Radio

Next to a telephone that will not work is a radio machine that registers everything, but the program that is struggling to present itself. The man who says that he caught a fifteen-pound bass last summer is now telling that his radio set gets Europe news every night.

Heartbeats that may be heard across the continent today are possible by the means of a "radio stethoscope," recently experimented on at the University of Minnesota. Anthony Zelvy, professor of physics at the university, announces.

Out in Incomar, Mont., the citizens close down the local power plant when they agree on a good radio program. They agree that it is better to be without the power than to have the plant interfere with radio reception, according to a letter received at station WJL, Chicago.

A run-down "B" battery can cause confusing sounds that cannot be distinguished from some forms of static. The quickest way to determine between them is to disconnect aerial and ground while your set is in operation. If the noise stops, your batteries are not causing it.

1303

Smart For the School Girl

A very practical style of dress for school wear is the model shown here. Ample freedom for play is provided by the deep inverted pleat in the front of the skirt. A vester of plain, contrasting color material is set onto the dress with three rows of machine stitching. The same stitching outlines the edge of the breast collar. The back is plain and the long sleeves are marked for a shorter length. Duro starch, linen, cotton broadcloth, or figured rayon would be suitable available materials for this frock. No. 1303, which is in sizes 8, 10, 12 and 14 years. Size 8 years requires sleeves 1/2 yard less material. Price 50 cents.

Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well-dressed children. Character and individuality for the junior folks are hard to buy, but easy to make with our patterns. A small amount of money spent on good material cut on simple lines, will give children the privilege of wearing adorable things. Price of the book 10 cents the copy.

Collects Snowflakes

W. A. Benley, of Jericho, Vermont, is a snowflake specialist. Benley says that February storms brought him about 75 new snowflakes, some of them of great beauty and interest.

Investigation proved that there are no snowflakes of identical shape. A man's will goes into effect after death, but a woman's will is in effect during life.

Kindness—a language the dumb can speak and the deaf can understand.

Failure Of One-Crop System

Attention Now Being Given to the Growing of Legumes

(By Jas. D. McGregor, Glenora, Stock Farm, Brandon, Manitoba)

Western Canada in the past has been a small grain growing country. The climate, soil and all other conditions have been such as to justify the great grain fields to the exclusion of other lines of farming. However, on land that has been farmed from 10 to 25 years, the production has increased from various causes, until the profits in strictly grain farming are no longer certain.

All one-crop or grain farmers realize sooner or later that the fundamental principle of farming is being neglected; that the decrease in yields and the difficulty with weeds, plant diseases and other pests, is due to the one-crop system, which depletes the available fertility of the soil, and does not provide for saving or increasing the fertility, or for controlling weeds and other pests. Hence, the great interest being taken in livestock, corn, alfalfa and clovers is not for these things alone, but because they will be the means by which the profitable yields and production of small grains may be maintained.

The one-crop system is not peculiar to Western Canada as all new countries have perished in the crop must easily grow, and which gave the best cash return. When this has ceased to be profitable, usually due to the depletion of soil fertility, attention has been given to such growing as legumes, the raising of livestock and perhaps to the use of some commercial fertilizer.

Legume is the name of a class of plants of which alfalfa, sweet clover and other clovers, beans, peas, etc., are members. The name is borne in some form of pod. This class of plants differs from all others in that they provide a means of obtaining nitrogen from the air. Nitrogen is one of the essential elements of plant food. No plant can make any growth whatever without it, and it is the most expensive element when bought in commercial fertilizer. It is also the most abundant element in nature, as more than half the air is nitrogen. Hence, clovers, alfalfa, etc.—legumes—are utilized for the purpose of restoring this element of soil fertility. Young animals, and particularly dairy cows, must have nitrogen in their feed, for no growth or milk can be made without nitrogen.

All plants use nitrogen, but the grains, grasses, corn, etc., must rely on the small available store in the soil, while the legumes may draw on the unlimited stores in the air. For this reason the hay and seed from legumes are much richer in nitrogen than that from the grains and grasses. Legumes obtain this atmospheric nitrogen by the aid of bacteria which live in tubercles on their roots. Unless these bacteria are present, the legume would be no more able to utilize the atmospheric nitrogen than any other plant. When the bacteria are not present, or for any reason will not grow on the roots, the legume will not produce satisfactorily because it is natural for these plants to obtain a part of their nitrogen from the air.

Artificial inoculation, using a soil, etc., may be employed to advantage, especially on poorer soils.

Farmers of the old farming regions resort to every known means of saving plant food and returning it to the soil. Here in the new country, when land is worked out, we have no way on west or north, to new land, etc., may be employed to advantage, especially on poorer soils.

The greatest asset of the farmer is his soil fertility. Like fortune, fertility may either be used over and over again, or it can be dissipated and wasted in a few years. When yields are below the cost of production, or below what they formerly were, it is evident that there is need for studying this situation. Rotation of crops aids in controlling weeds, plant diseases and insect pests, and also enables the farmer to feed livestock and return a part of the fertility to the soil in the shape of barnyard manure.

The time is here when these things must receive attention, and prudent is the farmer who secures a system of farming that will save soil fertility, and keep his land free of weeds and plant diseases, while he is yet able to do so.

Faith enables a man to get cash.

WARTS.

Apply this freely and often. Also splendid for corns and bunions.
